

City Ranger 2250 Weed Brush

The weed brush is the perfect, most-effective eco-friendly tool for keeping outdoor areas weed-free, i.e. pavements, paths, flagstones, asphalt, etc. There isn't a weed anywhere that can resist the rotating brush as it sweeps over them. The brush scours weeds loose and stresses new shoots. Regular brushing keeps an area weed-free without the use of pesticides.

Eco-friendly and easy to work with

The weed brush is extremely manoeuvrable and very easy and precise to work with. It is hydraulically-adjustable in all directions. The brush head can be turned and angled so that the work is done exactly where you want it. The brush works on flats, slants, right angles and circles – fighting weeds on flat open areas, on kerbs and around lampposts. The weed brush can be fitted with a vacuum nozzle (optional equipment) and combined with the suction sweeper hopper it can remove all of the weeded material and any new seeds. It is very effective at preventing and fighting weeds, and cleans up as it goes.

When you change attachments, the City Ranger 2250 hydraulic hoses are connected at the turn of a handle!

Technical Data Weed Brush

Special features:

- Hydraulically fully-adjustable = very flexible
- Powerful construction ensures precise control
- Can be controlled $\frac{3}{4}$ of the way around a lamppost
- Easily removes weeds from vertical surfaces
- Triple effectiveness: Prevents weeds, fights weeds and cleans up
- Brushes can be changed while still attached to the City Ranger 2250
- Attaching and detaching is easy with the automatic support strut
- Environmentally future-proof

Extra equipment:

Two types of brush are available with the Nilfisk Outdoor weed brush:

Soft weed brush – flat steel bristles

Stresses and removes weeds while being gentle on surfaces. Ideal for flagstones that are susceptible to marking and need regular weeding

Hard weed brush – mix of flat steel bristles and steel wire

Used for heavy work on bigger, stronger weeds. Ideal for flagstones and asphalt paths that need regular weeding

Guard

Used to prevent weeds from spreading over a wide area and for collecting the weeds under the vacuum nozzle

Vacuum nozzle – combined with the suction sweeper hopper

Immediately vacuums uprooted weeds into the hopper

Counterweight

If the weed brush is being used without the suction sweeper hopper we recommend the use of a counterweight for balancing

Dimensions

Attached:

Length	3,850 mm
Width	1,020 mm
Height	1,960 mm

Storage dimensions:

Length	1,500 mm
Width	1,000 mm
Height	850 mm

Technical data:

Weight	115 kg
Working zone width	2,250 mm
Ground clearance under brush	330 mm
Ground clearance under vacuum nozzle	90 mm
Brush diameter	675 mm
RPM	114/min.
RPM with brush-speed regulator	0-114/min.
Typical working speed	2-4 km/h
